Education

Indian Institute of Technology, Kharagpur

Bachelor of Technology + Master of Technology in Mining Engineering

2022–2027

8.77/10CGPA

Delhi Public School Eldeco

Central Board of Secondary Education, Class XII

2018–2021

94%

Technical Expertise

Languages: C, C++, HTML, CSS, JavaScript, React Native, Python

Frameworks and Libraries: React.js, NumPy, Matplotlib, Scikit-Learn, Seaborn, OpenCV, Selenium, MySQL

Softwares and Tools: JSON, Jupyter Notebooks, Git, GitHub, VS Code, Figma, Power BI

Internships

Karix Mobile Pvt. Ltd.

May 2025 – Jul 2025

Product Intern (APIs & Platform)

Gurgaon, India

- Authored a **PRD for Meta Flow**, defining API specs, data workflows, and system dependencies for platform integration
- Collaborated with engineers on **API integration**, validating endpoints, resolving blockers, and ensuring seamless data flow
- Bridged **business and technical requirements** by translating needs into actionable tasks for efficient cross-team delivery
- Contributed to **feature implementation** via backend feasibility reviews, system design discussions, and deployment testing

Projects

Capstone Project

Oct 2024 – Nov 2024

Objective: *ML model to forecast e-commerce discounted prices using regression techniques*

Self Project

- Built a robust **ML model** to forecast discounted product prices on e-commerce platforms using regression techniques
- Conducted comprehensive **EDA**, **feature engineering**, and applied the **MICE** algorithm to impute missing values
- Optimized and fine-tuned **XGBoost**, **Random Forest** & **Decision Tree** models, achieving a **6.67% RMSE reduction**

Dog Breed Classification Model

Dec 2024 – Jan 2025

Objective: *To build a CNN model for accurate dog breed classification from images*

Self Project

- Developed a Deep Learning **CNN** model using the Stanford Dogs dataset (20K images, 120 breeds) for breed classification
- Implemented **Keras** with MobileNetV2, ReLU, and Adam optimizer, reaching **91%** train and **70.14%** val accuracy
- Refined **1.43M trainable parameters** across 10 epochs using ImageDataGenerator for efficient data augmentation
- Constructed a **Streamlit app** integrating TensorFlow Lite, enabling real-time image classification with confidence scores

Nvidia Stock Prediction using LSTM

Dec 2024 – Jan 2025

Objective: *To develop an LSTM model for forecasting Nvidia's stock closing prices from historical data*

Self Project

- Designed and trained a two-layer predictive **LSTM neural network** to accurately predict Nvidia's future stock trends
- Preprocessed data with **Min Max Scaler**, performed 80–20 train-test split, and optimized using **Adam** with **MSE loss**
- Achieved a low **RMSE of 1.41×10^{-5}** and closely visualized model predictions against actual closing prices for validation

Competition

American Express — Decision Science Track - The American Express Campus Challenge 2025

Objective: *To predict customer click probability for daily offers and rank the most relevant ones, enhancing user engagement*

- Processed **700K+** records with **396 features**, fixed duplicates, imputed values, and dropped **>99.5% null columns**
- Carefully engineered, refined, and scalable features using one-hot and label encoding to further boost overall model accuracy
- Enhanced and fine-tuned **LightGBM** with **Optuna** and **SelectKBest**, achieving an impressive **MAP@7** score of 0.447

Extracurricular Activities

- Served as a **Mentor** in the **Institute Wellness Group**, guiding freshmen in academics and extracurricular activities
- Represented **MMM Hall** in **Lawn Tennis (GC 2023)**, competing against 20+ Halls in the Inter-Hall Championship
- Led a 20-member team as **Captain**, winning **Gold** in Open IIT Product Management'24 and **Silver** in Ad Design'24
